

Text Numbering Count

Goal: To check the accuracy of text numbers and gloss formatting

TEXT:

- Count line/paragraph numbers to check for accuracy and sequential ordering. Be aware of unnumbered lines.
 - If it's a facing-page translation, check that line/paragraph numbers match up between the original lang and the modern English translation.
- If it's a Prose text, make sure the paragraph numbers restart at every chapter and book.
 - Check also that book and chapter numbers appear in sequential order.

NB: If there are major numbering errors, insert a comment where numbers get off, and return to the VEs to correct. They must also re-collate to the E- and T-Notes (and any additional back matter), and check/revise cross-references. Note that the Managing Editor will double check cross-references in Second Read.
